TRANSMITTAL OF INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

An Information Disclosure Statement by Applicant is transmitted herewith, which cites United States Patent No. 5,884,332 to Julie A. Snedeker (Globe Manufacturing Company) wherein the abstract reads (with added emphasis) as follows:

An outer protective shell of either a jacket or trousers has a torso portion and a pair of appendage portions connected to the torso portion. A liner is disposed within the shell and includes an outer moisture barrier and an inner thermal barrier. The moisture barrier is formed of a plurality of pieces joined together at seams. Sealing tapes on the inner surface of the moisture barrier are disposed over the seams to provide a waterproof seal at the seams. Lower edge portions of the moisture barrier and the thermal barrier are detachably connected to one another at spaced points so that the moisture barrier and the thermal barrier can be manually separated from one another to visually inspect said sealing tapes at all of said seams. **In the jacket, the remaining edge portions of the barriers are permanently connected to one another.** These remaining edge portions are detachably connected to the shell at spaced locations along the remaining edge portions. **In the trousers, the upper edge portions of the barriers are permanently connected to one another** and are detachably connected to the shell. In both the jacket and trousers, fasteners detachably connect the lower edge portion of the moisture barrier to the shell at spaced points along the lower edge portion of the moisture barrier.

The undersigned attorney submits that each claim of the application noted above, for which the issue fee has been paid, is distinguished patentably from the cited Snedeker patent by calling for
